

Statuses

On this page:

- [Status Properties](#)

The Status configuration page allows you to create and manage predefined Statuses that Users can set via the presence management system. You can access the Status configuration page by selecting **Statuses** in the Administration Interface.

Status Properties

<u>Core Settings</u>	
Name:	The display name of the Status.
Note:	The note to be displayed when this status is set on a User.
Type:	The type of the status. Used to determine which icon is shown for this status.
